NOMAD

TABLE / Jan Goderis

NOMAD

The NOMAD is a collection of tables designed by Belgian architect Jan Goderis.

The name of the NOMAD table refers to the original idea of the designer to create a table that is relatively easy to take along for modern urban nomads when moving, with a table top made of 3 separate parts and easily mountable legs, without the traditional metal frame.

The NOMAD is now available in a compact version with table top in one piece but still true to its name by the ease of setting up or dismantle and with design details at the surface of the table top referring to the original idea of the 3 separate parts.

The NOMAD is an elegant contemporary table, suitable for any type of interior but definitely a piece of furniture that will stand out with the connection of the table legs as a key accent, appearing as 4 circles at the top of the table. The table top itself does not have a frame, which makes the NOMAD unique in construction and elegant in looks.

The table top of the NOMAD is made out of natural oiled oak or walnut veneer on a multiplex base. This makes the table top strong as solid wood, without the disadvantages of the ever living solid wood. The table legs are made of metal, powder coated in mat black or white.

The NOMAD has a height of 72 cm and a standard width of 95cm. Available lengths of the table top are 200 / 240 / 280 cm (other lengths on demand).

Dimensions (approx.)

	S	M	L
H (cm)	200	240	280
L (cm)	72	72	72
D (cm)	95	95	95
W (kg)	70	80	95
