

# FALK

We stopped looking at trash as a problem and started seeing it as the resource it is. And we created a chair made of recycled everyday household plastic.

# FALK

We stopped looking at trash as a problem and started seeing it as the resource it is. And we created a chair made of recycled everyday household plastic.

## DESIGNER THOMAS PEDERSEN

Thomas Pedersen graduated from Aarhus School of Architecture in Denmark in 2002 and set up SPARK design studio later the same year.

Pedersen's designs embody Danish Modern characteristics, with a clear emphasis on simplicity. He combines classic organic lines with innovative ideas and details.

Much of his fascination for furniture design derives from the fact that it is possible to build full-scale models of the concepts he has in his head. He is firmly convinced that it is only by doing this that it is possible to test the qualities of his products with his own body, to assess their durability and thus make certain that the results live up to expectations.

## MADE IN DENMARK

The technology and production behind FALK are developed in Denmark. So looking at FALK, you are basically looking at the result of the marriage between the Danish heritage of furniture design and cutting edge Danish innovation in applying new thinking and materials into a chair

## RESPONSIBLY SOURCED MATERIALS

To us sustainability and responsibility go hand in hand, but most importantly, we make sure we can document what we do.

FALK consists of three parts; the shell, the seat and the legs. All parts are created with an environmental mindset, using natural materials from responsible sources. FALK is designed to last a lifetime and more, and is currently providing 5 years warranty.
