DO IT

MIRROR / Joana Marcelino

DO IT

DO IT is a wall-mounted mirror with two overlapping disks in glass and marble, designed by Joana Marcelino (P) in 2016 for PER/USE.

The marble disk closest to the wall can be turned upwards counter-clockwise in 8 positions and is used to write a message on. The front disk in mirror-glass keeps in a fixed position while the back part is turned.

The name DO IT refers to a note with instructions you can write on the largest disk. When pronounced [duet] it is also referring to the interaction as in a musical piece.

The DO IT collection of mirrors is produced in Europe from outstanding quality Portuguese or Spanish stone such as Pele de Tigre and Nero Marquina.

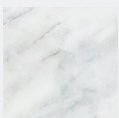

Thanks to the ingenious click and hanging system, the marble disk of the DO IT can be rotated and fixated at different heights at the right-hand side of the mirror.

The playful yet functional design of the DO IT makes it a mirror not only usable in home interiors but also in commercial environments and public spaces. Take a pen and Start With The Man In The Mirror!
