THE LOVERS
LIGHTS / Frederik Delbart

THE LOVERS

The LOVERS are a collection of pendant atmospheric lights in glass, designed by Frederik Delbart (B) in 2014 for PER/USE.

The name LOVERS refers to the attractive force that draws any two entities together in a relationship, making a connection by tapping inner energy.

The LOVERS are made of two superseding glass parts: a white conic closed core surrounded by a coloured calix shell with a round opening downwards. Different finishes of the glass parts and interacting colours provide a warm and soft atmospheric light.

The glass of the LOVERS is handmade and artisanal mouth-blown in traditional glass workshops in Central Europe. The unique aluminium connection system and electrical parts are further assembled in Belgium.

The system with a removable inner part makes it very easy to install and maintain the LOVERS or change the bulb when needed. The lamp can be installed stable and at the required length by 2 steel wires.

The use of coloured, transparent and smoked glass makes this lamp a chameleon, ready to be integrated in any interior.

Bulb (not included) specifications:

LOVERS Small : E14 – 110-230V AC – max. 60 Watt max. Ø: 40mm

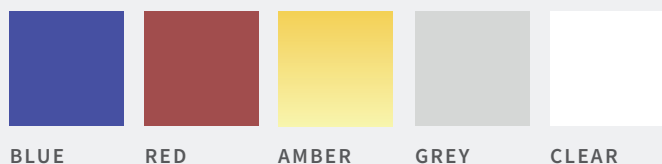

LOVERS Large : E27 – 110-230V AC - max. 100Watt – max. Ø: 50mm

A schematic installation manual is included for your professional electricity installation partner.

Dimensions (approx.)

	(NET)		(PACKED)	
	S	L	S	L
H (cm)	25	40	35	62
Ø (cm)	24	38,5	35	45
W (kg)	4	9	5	10
